DETAILED ACTION

1. This action is responsive to the communication filed on 6 June 2007. By this amendment, claims 1, 7, 8, 12, 20, 25, 32, 39, 41, 43-44, 47, 49 and 51 are amended, claims 53-54 are newly added claims and claims 3-4, 9-10, 21-22 and 27-28 are canceled. Therefore, claims 1-2, 5-8, 11-20, 23-26 and 29-54 are pending. After an in-depth review by the examiner, the instant application is being restricted. Applicant's amendments necessitate an election/restriction requirement.

Election/Restrictions

2. This application contains claims directed to the following patentably distinct species:

Species 1: Figure 2 is associated with Claims 1-2, 5-6 and 53-54

Species 2: Figure 5 is associated with Claims 7-8 and 11-12

Species 3: Figure 8a is associated with Claim 13-19

Species 4: Figure 7 is associated with Claims 20, 23-24 and 44-52

Species 5: Figure 6 is associated with Claims 25-26 and 29-43

3. The species are independent or distinct because each of the various disclosed species details a mutual exclusive characteristic of:

Species 1: ciphering activation process using a RAND value

Species 2: computing a specific key value required for a ciphering activation process and ciphering the call information

Species 3: ciphering activation process using an SRES value

Species 4: deactivating ciphering of call information

Species 5: communicating ciphering information

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

6. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

8. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

9. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
